

Bachelor of Science in International Trade

About the program

In the growing field of international trade, skilled managers are highly sought after by global corporations. Thunderbird School of Global Management's Bachelor of Science in International Trade (BSIT) provides talented, driven students with exposure to the global business environment that will distinguish them in the workforce. Prepare yourself for these positions with courses such as supply chain management for global operations, international trade and regional economic agreements and big data in the global economy offered through this unique degree program.

With a curriculum guided by a Global Mindset, students will gain the tools necessary for managing supply chains, systematically assessing risk, exporting and importing goods and services, and developing effective strategies for conducting international trade.

This program is unique in that it allows students to learn new skills needed for a career in international trade through comprehensive, hands-on training and application of these skills during a local, national or international internship. Along with real-world learning experiences that provide global career opportunities, students attend courses taught by world-renowned Thunderbird faculty and enjoy opportunities to learn from students from around the world.

Summer internship

Phoenix, Arizona
(ASU West Campus)

100% Online option

STEM
Certified
