Bachelor of Science in International Trade

About the program

The Bachelor of Science in International Trade provides talented, driven students with the exposure to the global business environment that will distinguish them in the workforce. Students learn the functional disciplines of international business while gaining an in-depth understanding of the political, cultural and economic aspects of doing business on a global scale and in international markets in which government regulations vary widely from country to country.

Through Thunderbird’s training that builds a global mindset, students gain tools for managing supply chains, systematically assessing risk, exporting and importing goods and services, and using economic agreements to develop effective strategies for conducting international trade.

This program is unique in allowing students to learn new skills needed for a career in international trade through comprehensive, hands-on training and application of these skills during a local, national or international internship. Along with real-world learning experiences that provide global career opportunities, students attend courses taught by world-renown Thunderbird faculty and enjoy unique opportunities to learn from fellow students from around the world.
Who should attend?

- Students interested in international careers in trade and business
- International students who want to take advantage of an additional 2 years option OPT offered by STEM-certified programs
- Students seeking careers where an in-depth understanding of the political, cultural, and economic aspects of doing business on a global scale are needed
