

Space Leadership, Business, and Policy

Certificate Overview

Space is booming. Learn to lead in the new space economy. An increasing number of commercial startups and emerging entrepreneurs are building their business models around products or services for space markets. From NASA's budget expanding for the first time in decades to the establishment of the United States Space Force, the space sector is boldly making new commitments to the final frontier.

Thunderbird's executive certificate in Space Leadership, Business, and Policy, features powerful guest speakers, valuable learning materials and a site visit to a space facility (DC Only).

Taught by globally recognized space leaders and distinguished academic faculty, participants will learn from experts and practitioners how to discover growth opportunities in the space industry.
