

Integrated Space Operations: Leading the Multi-Domain Commercial Enterprise

The global space economy is projected to reach \$1.8 trillion by 2035, creating demand for leaders who can integrate commercial strategy, defense, policy, and emerging technology. Participants learn from expert practitioners across NASA, commercial space, and the defense sector, while engaging with senior industry leaders through expert panels, facility tours, and structured networking.

\$6,500 | 5 days | in person

Program benefits

- Develop cross-domain leadership across commercial, civil, and national security space enterprises.
- Navigate hybrid military-commercial architectures, governance, and mission assurance.
- Strengthen decision-making for complex space operations and cybersecurity challenges.
- Explore dual-use business strategies and public-private partnerships.
- Gain firsthand insights through industry panels, facility tours, and executive networking.
- Leave with practical leadership frameworks, an ASU–Thunderbird Certificate of Completion, and access to the Thunderbird Space Industry Network.
